

INSTALLATION INSTRUCTIONS

SURFACE MOUNT ROUND RAIN MACHINE®

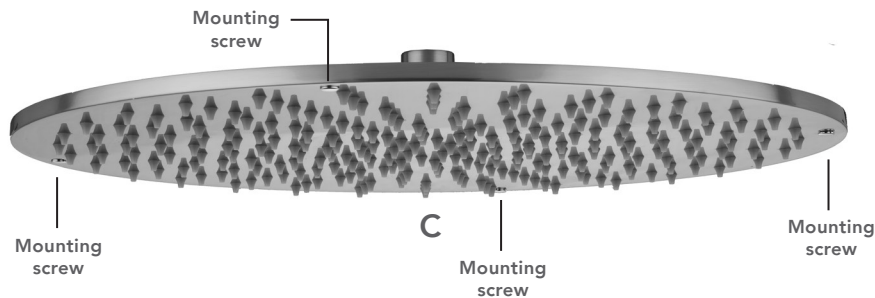

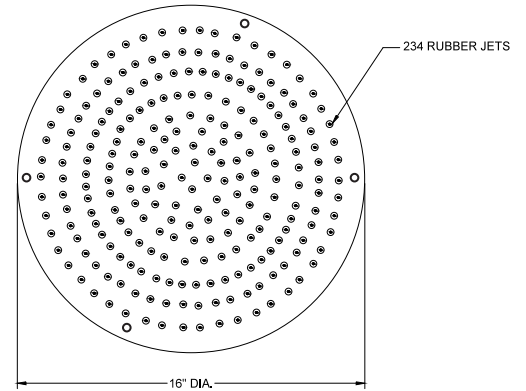

Part #: S218

JACLO®

Confidence from start to finish.®

PARTS

- (A) **3024-HP** High pressure stainless steel hose
- (B) **D16304-12** Supply street elbow
- (C) **S216** Rain Machine Showerhead
- (D) 4pc. of Mounting screws

PREPARATION

1. Determine center location of Rain Machine
2. Open a 8-10" hole in ceiling based on center of head
3. Bring feed pipe to 6" off center (this allows the removal of head for maintenance if needed and the 24" high pressure hose will let you drop the head to a comfortable position before the street elbow has to be removed)

INSTALLATION

1. Screw one end of the high pressure hose (A) to water outlet in ceiling
2. Screw street elbow (B) to the other end of the high pressure hose (A)
3. Screw showerhead (C) to male end of street elbow (B)
4. Screw four(4) mounting screws (D) through all four corners of showerhead to secure to ceiling
